

Meet two different sharks

An adult reads aloud. Children listen, talk and point.

Name: _____ Date: _____

Sharks are fish. Different sharks find food in different ways.

Whale shark

A whale shark is a very big fish. It has light spots. It eats tiny animals that drift in the water.

Leopard shark

A leopard shark has dark marks. It finds food near the ocean bottom. It eats crabs and worms.

Talk about the two sharks

Tell one way the sharks are alike. Then talk about one way they are different. Ask the adult to read a part again if you need it.

Tell your ideas. An adult can write your words on the lines.

Something I learned:

Something I wonder:

Writing is optional. You may speak, point or draw.

Science source: Georgia Aquarium: whale shark

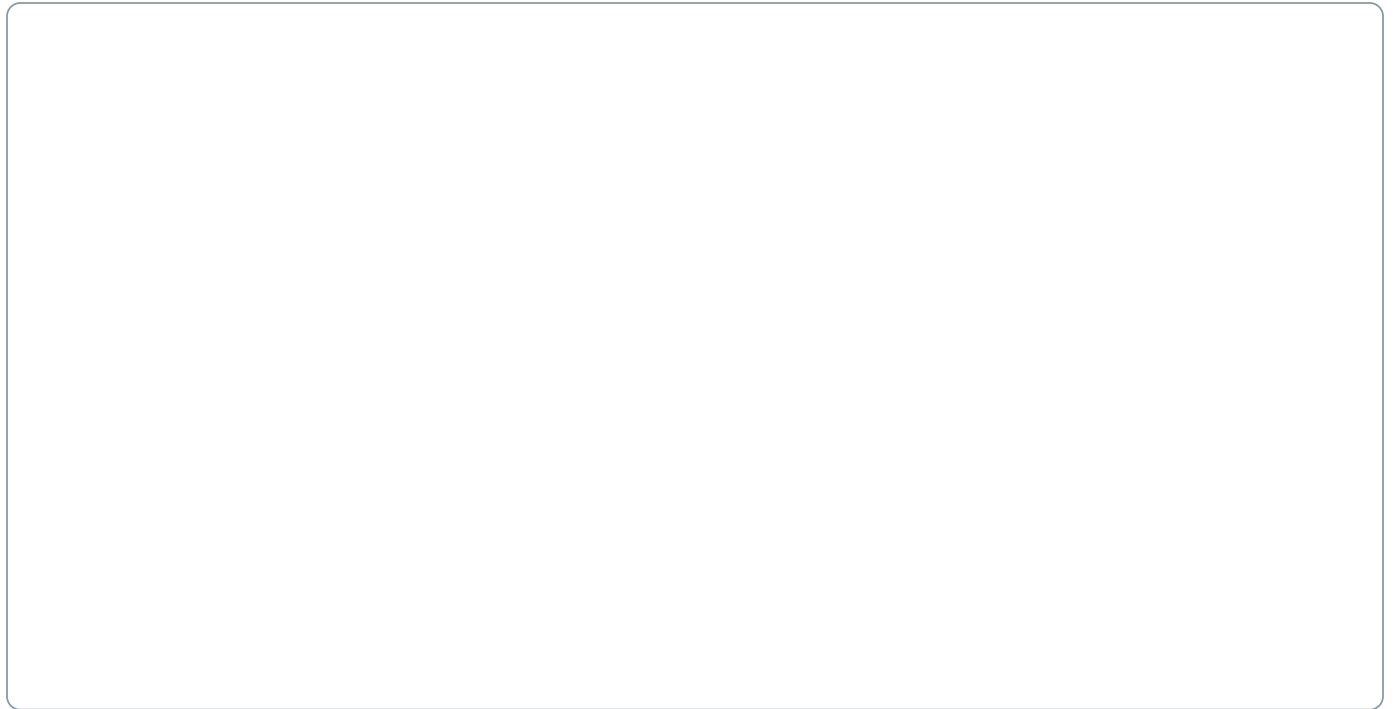

Science source: Monterey Bay Aquarium: leopard shark

Draw a discovery

Choose a whale shark or a leopard shark

Name: _____ Date: _____

Choose a shark. Draw it in the ocean. Add one thing you learned.

My shark is:

In my picture, I showed:

Point to one part of your picture. Tell your partner about it. An adult can write your words.
